LIPIVIEW

PRE-TESTING INSTRUCTIONS

Because the LipiView is a sensitive testing instrument, please diligently follow the instructions below:

1. Do not put your contact lens in your eyes the day of your dry eye evaluation. They may be inserted after the testing is completed.
2. Do not use ointments or gels around your eyes the evening prior to your dry eye evaluation. Do not use any Vaseline or oily cleansers to remove any eye makeup.
3. Do not use any lubricating drops on the day of your testing.
4. Do not use ANY prescription eye drops (i.e. glaucoma drops) less than two hours prior to testing.
5. Do not rub or touch your eyes two hours prior to testing.
6. Do not apply eye creams, facial cream, mascara or sunscreen prior to the testing.

Plan for a minimum of a 1 hour appointment the day of your testing.
